

OUTPUT:

Start the autopsy application

```
$ sudo autopsy
[sudo] password for crypl-19:

Autopsy Forensic Browser
http://www.sleuthkit.org/autopsy/
ver 2.24

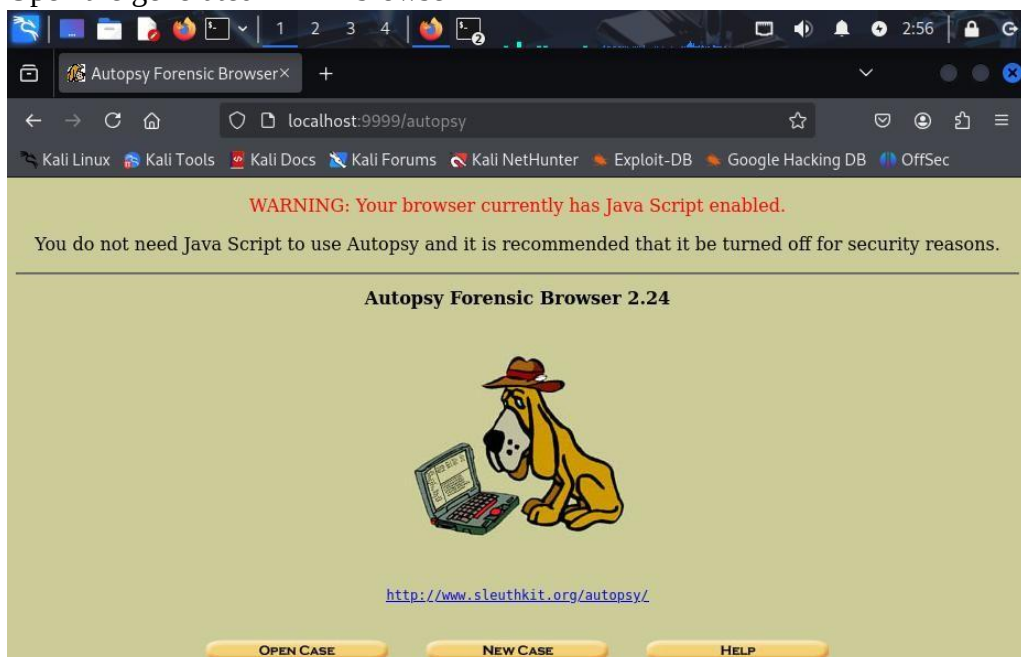

Evidence Locker: /var/lib/autopsy
Start Time: Fri May 9 02:54:48 2025
Remote Host: localhost
Local Port: 9999

Open an HTML browser on the remote host and paste this URL in it:

http://localhost:9999/autopsy

Keep this process running and use <ctrl-c> to exit
```

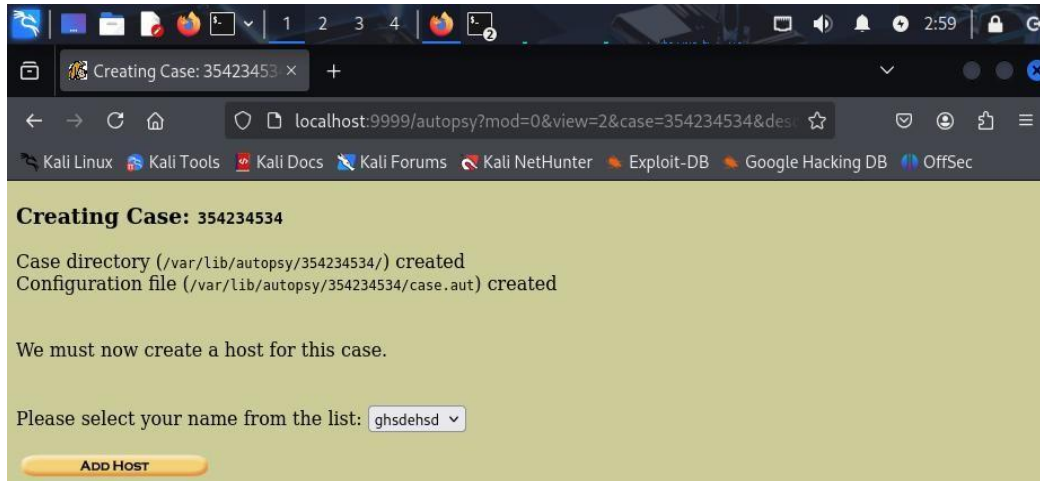

Open the generated link in browser

Create a new case

A screenshot of the 'Create A New Case' form in the Autopsy application. The form has a yellow background and is titled 'CREATE A NEW CASE'. It contains three main sections: 1. 'Case Name: The name of this investigation. It can contain only letters, numbers, and symbols.' with a text input field. 2. 'Description: An optional, one line description of this case.' with a text input field. 3. 'Investigator Names: The optional names (with no spaces) of the investigators for this case.' with a grid of ten input fields labeled a. through j. At the bottom, there are three yellow buttons: 'NEW CASE', 'CANCEL', and 'HELP'.

Add Hosts

The screenshot shows a web browser window with the title 'Creating Case: 354234534'. The address bar shows 'localhost:9999/autopsy?mod=0&view=2&case=354234534&des...'. The page content includes a header 'Creating Case: 354234534', a message 'Case directory (/var/lib/autopsy/354234534/) created' and 'Configuration file (/var/lib/autopsy/354234534/case.aut) created', a paragraph 'We must now create a host for this case.', a label 'Please select your name from the list:' followed by a dropdown menu showing 'ghsdehsd', and an 'ADD HOST' button at the bottom.

Creating Case: 354234534

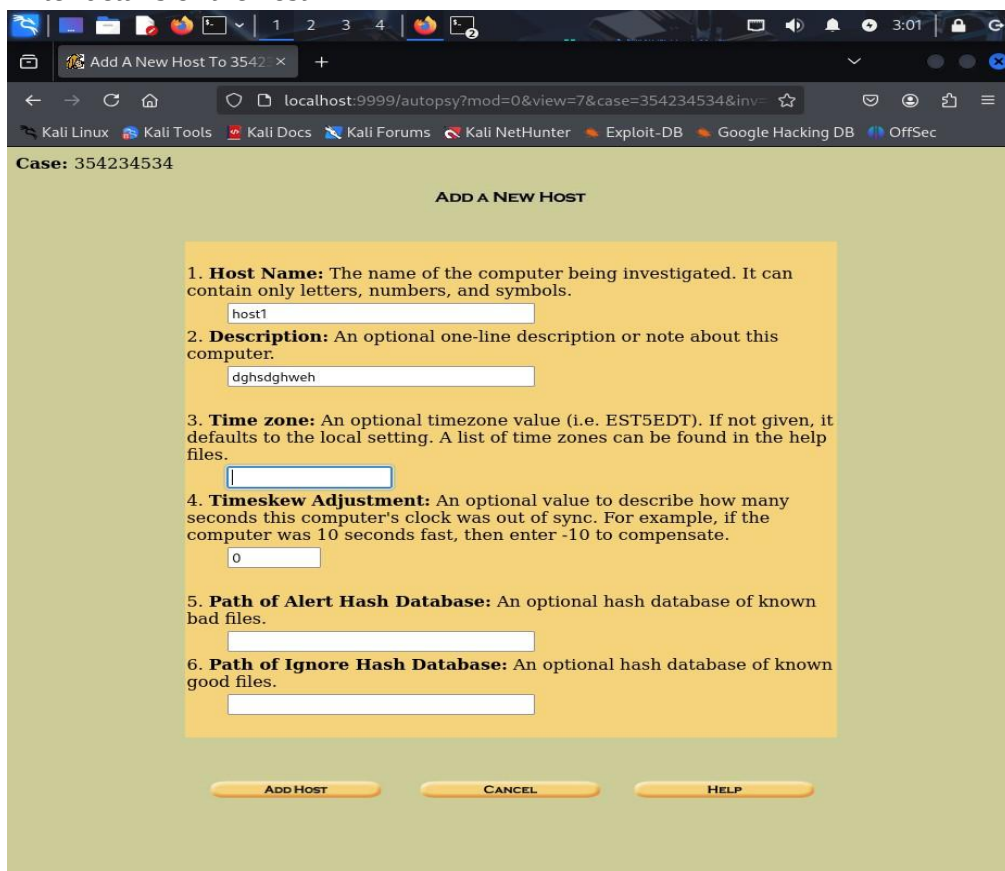

Case directory (/var/lib/autopsy/354234534/) created
Configuration file (/var/lib/autopsy/354234534/case.aut) created

We must now create a host for this case.

Please select your name from the list:

ADD HOST

Enter details of the host

The screenshot shows a web browser window with the title 'Add A New Host To 354234534'. The address bar shows 'localhost:9999/autopsy?mod=0&view=7&case=354234534&inv...'. The page content includes a header 'Case: 354234534' and 'ADD A NEW HOST'. Below this is a form with six numbered fields: 1. Host Name (host1), 2. Description (dghsdghweh), 3. Time zone (empty), 4. Timeskew Adjustment (0), 5. Path of Alert Hash Database (empty), and 6. Path of Ignore Hash Database (empty). At the bottom are three buttons: 'ADD HOST', 'CANCEL', and 'HELP'.

Case: 354234534

ADD A NEW HOST

1. **Host Name:** The name of the computer being investigated. It can contain only letters, numbers, and symbols.

2. **Description:** An optional one-line description or note about this computer.

3. **Time zone:** An optional timezone value (i.e. EST5EDT). If not given, it defaults to the local setting. A list of time zones can be found in the help files.

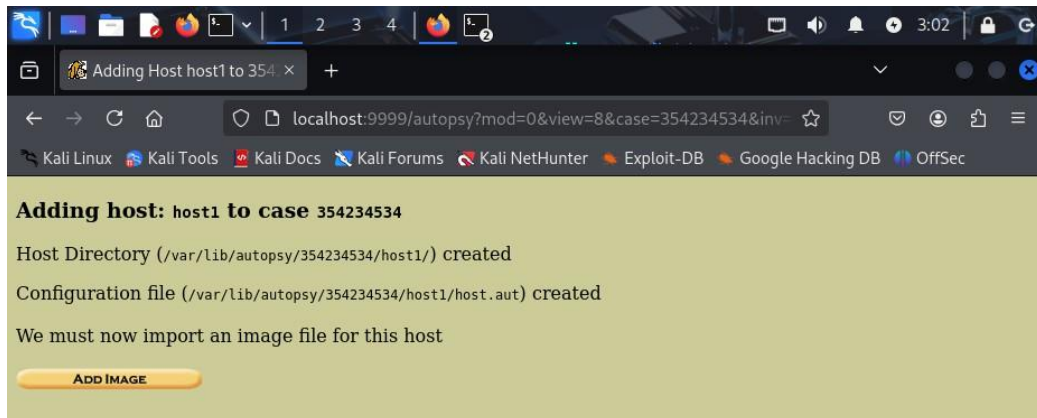

4. **Timeskew Adjustment:** An optional value to describe how many seconds this computer's clock was out of sync. For example, if the computer was 10 seconds fast, then enter -10 to compensate.

5. **Path of Alert Hash Database:** An optional hash database of known bad files.

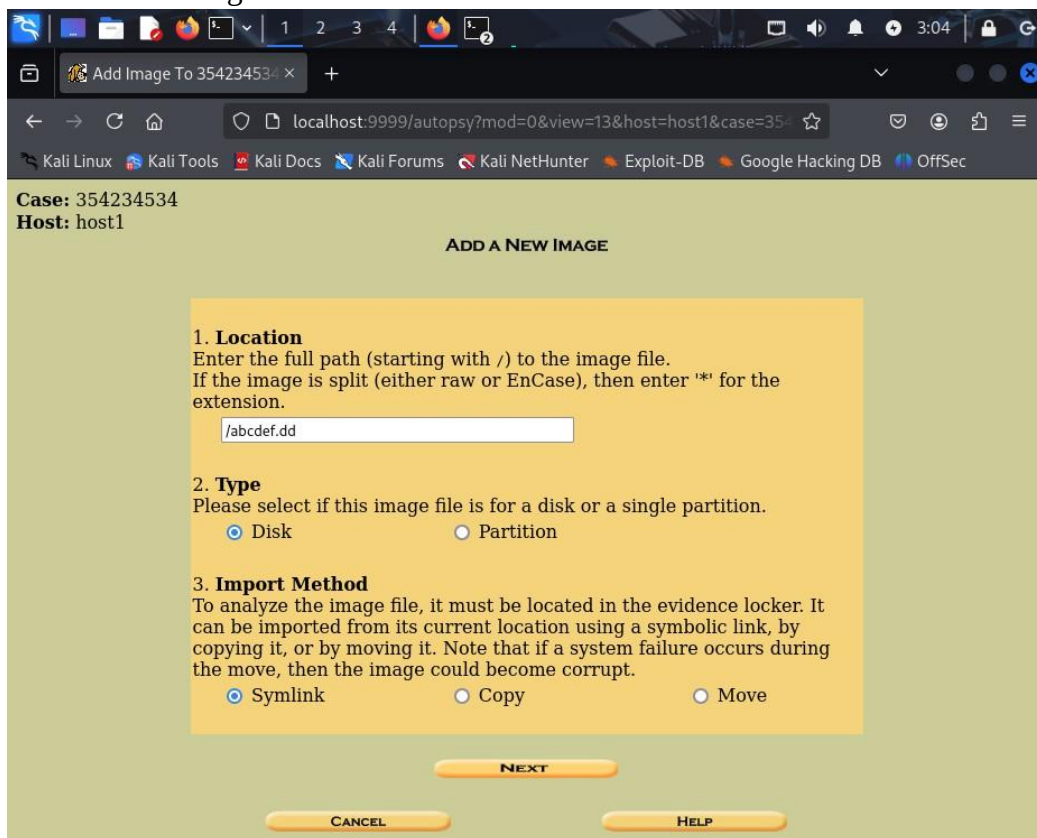

6. **Path of Ignore Hash Database:** An optional hash database of known good files.

ADD HOST **CANCEL** **HELP**

Host added

Add the disk image in the case

Ensure the encryption method

Image File Details

Local Name: images/abcdef.dd

Data Integrity: An MD5 hash can be used to verify the integrity of the image. (With split images, this hash is for the full image file)

☐ Ignore the hash value for this image.

☐ Calculate the hash value for this image.

☐ Add the following MD5 hash value for this image:

☐ Verify hash after importing?

File System Details

Analysis of the image file shows the following partitions:

Partition 1 (Type: NTFS / exFAT (0x07))

Sector Range: 2048 to 30523391

Mount Point: File System Type:

For your reference, the mmls output was the following:

DOS Partition Table
Offset Sector: 0
Units are in 512-byte sectors

	Slot	Start	End	Length	Description
002:	000:000	0000002048	0030523391	0030521344	NTFS / exFAT (0x07)
